Light lamps

LA FILOSOFIA

Apgaismojiet tagadni, pievēršot uzmanību pagātnei un nākotnei.

Produktu kopšana, pielāgošana un kombinācija ar LED tehnoloģiju padara šos izstrādājumus par ideālu risinājumu mēbeļu izgatavošanai un apgaismojumam ar lielu efektivitāti.

Čuguns, tērauds un alumīnijs - materiāli, kas izmantoti šiem izstrādājumiem, piemēroti vēsturiskiem centriem,

parki un dārzi, pilsētu teritorijas, kā arī
velosipēdu un gājēju celiņi.

PHILOSOPHY

Lighting the present with a view on the past and to the future.

The care of the manufactured items, the customizing and the combining with led technology, make these products the ideal solution to furnish and light with efficiency.

Cast iron, steel and aluminium are the materials used for these products, fit for historical centers, parks and gardens, urban zones and cycle and pedestrian paths.

INDICE - INDEX

4 Apgaismojums - *Lighting*

6 Stabiņi un lampas - *Cast iron posts and brackets*

12 stabi un no čuguna un tērauda - *Cast iron and steel posts and brackets*

24 Corpi illuminanti - *Lighting fixtures*

APGAISMOJUMS

LIGHTING

Plašs risinājumu klāsts, kas paredzēts pilsētu konteksta iekārtošanai un apgaismošanai, sākot no dārziem līdz maziem vēsturiskiem ciematiem, no parkiem līdz modernākām pilsētas teritorijām. Pieejams trīs sērijās: Čuguns - Čuguns un tērauds - Moderna, modulāra ar virsmām un pastorāliem ar vienu vai vairākām gaismām un plašu dažādu stilu apgaismojuma korpusu izvēli, kas aprīkota ar tradicionālām tehnoloģijām vai augstas efektivitātes gaismas diodēm. Pilns klāsts ar dažādām sienas plauktu un aksesuāru versijām, lai apmierinātu visas klienta un dizainera vajadzības.

A wide range of solutions designed for furnishing and lighting urban contexts, from gardens to small historic villages, from parks to more modern urban areas. Available in three series, cast iron - cast iron and steel - modern for installation on post and also on brackets and pastoral with one or more lights. A wide choice of lighting fixtures in various styles, equipped with traditional technology or high efficiency LEDs system. The range is completed with different versions of wall brackets and accessories to meet all the needs of the customer and of the designer.

Laterna Led- Led Lantern

LA02P-L

Lmākslinieciskā laterna no lietā alumīnija (UNI EN 1706), piegādāta CUT-OFF versijā vai ar matētu vai caurspīdīgu PMMA ekrānu.

paredzēts tiešai staba vai balstiekārtas stiprināšanai.

laternas exo 8,5 kg, viss iekļauts.

Paredzētais lietojums:

Tā izmēri 605x325mm padara šo apgaismojuma korpusu piemērotu uzstādīšanai mazās vai vidējās ielās un laukumos, vēsturiskos centros, parkos un dārzos, velosipēdu un gājēju celiņos utt.

Led:

Tas ir aprīkots ar mūsdienīgu LED sistēmu, kas sastāv no ļoti augstas efektivitātes Osram gaismas diodēm ar krāsu temperatūru 3000/4000 ° K un mainīgu jaudu no 22 līdz 56W - optikas sistēmu, kas atbilst dizainera vajadzībām, pamatojoties uz IP55 aizsardzības pakāpi, IP66 optiskajam nodalījumam.

Ciclo verniciatura:

Marinēšana un mazgāšana ar demineralizētu ūdeni, nanotehnoloģiskais process, žāvēšana 160 ° C temperatūrā, viena kārtā un viena poliestera pulvera emaljas kārtā un polimerizācija krāsnī 200 ° temperatūrā.

Mākslinieciskā laterna no lietā alumīnija (UNI EN 1706), piegādāta CUT-OFF versijā vai ar matētu vai caurspīdīgu PMMA ekrānu.

Piemērots tiešai fiksēšanai uz stieņa vai piekarināmā. Komplektā laternas svars 8,5 kg.

Usings:

The dimensions of 605x325mm, make this lighting fixture suitable for installation on small and medium-sized streets and squares, historic centers, parks and gardens, cycle and pedestrian paths and so on.

Led system:

It is equipped with a state-of-the-art LED lighting system composed of high efficiency Osram LEDs with color temperatures of 3000/4000 ° K and varying capacities from 22 to 56W, a system of optics that meet the designer's needs according to the type of installation. IP55 degree of protection, for the IP66 optical compartment.

Painting cycle:

Pickling and washing with demineralized water, nanotechnological process, drying at 160 ° C, a primer coat and a coat of polyester powder enamel and polymerisation in oven at 200°.

Lantern artistic in fusione di alluminio (UNI EN 1706) fornita in versione CUT-OFF o con schermi in PMMA Ghiacciati o Trasparenti.

Predisposta per il fissaggio diretto su palo o a sospensione.

Peso della lanterna 8,5 Kg tutto incluso.

Destinazione d'uso:

Le sue dimensioni di 605x325mm, rendono questo corpo illuminante adatto per essere installato su strade e piazze di piccole o medie dimensioni, centri storici, parchi e giardini, percorsi ciclopedonali, ecc.

Impianto:

E' dotata di un cablaggio integrato per lampade a scarica con protezione termica, fusibile e sezionatore manuale. Potenze variabili da 35 a 70w, portalampada ceramici E27 o G12.

E' disponibile anche la versione E27.

Grado di protezione IP55, per il vano ottico IP66.

Ciclo verniciatura:

Decapaggio e lavaggi con acqua demineralizzata, processo nanotecnologico, asciugatura a 160°C, una mano di fondo ed una mano di smalto a polvere poliesteri e polimerizzazione in forno a 200°.

Artistic lantern in cast aluminum (UNI EN 1706) supplied in the CUT-OFF version or with frosted or transparent PMMA screens.

Suitable for fixing on pole or suspended.

Lantern weight 8.5 Kg all included.

Usings:

Its dimensions of 605x325mm, make this lighting fixture suitable for installation on small and medium-sized streets and squares, historic centers, parks and gardens, cycle and pedestrian paths and so on.

System:

It is equipped with an integrated wiring for discharge lamps with thermal protection, fuse and manual disconnecter. Variable powers from 35 to 70w, ceramic lamp holder E27 or G12. E27 version is also available. IP55 degree of protection, for the IP66 optical compartment.

Painting cycle:

Pickling and washing with demineralized water, nanotechnological process, drying at 160 ° C, a primer coat and a coat of polyester powder enamel and polymerisation in oven at 200°.

Predisposto per il fissaggio a sospensione.

Destinazione d'uso:

Le sue dimensioni di Ø500x229mm, rendono questo corpo illuminante adatto per essere installato su strade e piazze di piccole o medie dimensioni, centri storici, parchi e giardini, percorsi ciclopedonali, ecc.

Impianto Led:

E' dotato di un impianto Led all'avanguardia composto da Led Osram ad altissima efficienza con temperatura di colore a 3000/4000°K e potenze variabili da 22 a 56W, un sistema di ottiche che rispondono alle esigenze del progettista in base alla tipologia dell'installazione. Grado di protezione IP66.

Ciclo verniciatura:

Decapaggio e lavaggi con acqua demineralizzata, processo nanotecnologico, asciugatura a 160°C, una mano di fondo ed una mano di smalto a polvere poliesteri e polimerizzazione in forno a 200°.

Lighting fixtures in aluminium sheet supplied in CUT-OFF version.

Suitable for fixing on suspended.

Usings:

The dimensions of Ø500x229mm, make this lighting fixture suitable for installation on medium and small-sized streets and squares, historic centers, parks and gardens, cycle and pedestrian paths and so on.

Led system:

It is equipped with a state-of-the-art LED system consisting of high efficiency Osram LEDs with color temperatures of 3000/4000 ° K and varying capacities from 22 to 56W, a system of optics that make it customizable according to the needs of the designer and according to the type of installation.

IP66 degree of protection.

Painting cycle:

Pickling and washing with demineralized water, nanotechnological process, drying at 160 ° C, a primer coat and a coat of polyester powder enamel and polymerisation in oven at 200°.

LMo1S-L

Corpo illuminante in lamiera di alluminio, attacco palo in pressofusione di alluminio, fornito in versione CUT-OFF. Predisposto per il fissaggio diretto su palo.

Destinazione d'uso:

Le sue dimensioni di Ø500x229mm, rendono questo corpo illuminante adatto per essere installato su strade e piazze di piccole o medie dimensioni, centri storici, parchi e giardini, percorsi ciclopedonali, ecc.

Impianto Led:

E' dotato di un impianto Led all'avanguardia composto da Led Osram ad altissima efficienza con temperatura di colore a 3000/4000°K e potenze variabili da 22 a 29W, un sistema di ottiche che rispondono alle esigenze del progettista in base alla tipologia dell'installazione. Grado di protezione IP66.

Ciclo verniciatura:

Decapaggio e lavaggi con acqua demineralizzata, processo nanotecnologico, asciugatura a 160°C, una mano di fondo ed una mano di smalto a polvere poliesteri e polimerizzazione in forno a 200°.

Lighting fixtures in aluminium sheet supplied in CUT-OFF version with pole fixing in die-casting aluminium.

Suitable for fixing on post.

Usings:

The dimensions of Ø500x229mm, make this lighting fixture suitable for installation on medium and small-sized streets and squares, historic centers, parks and gardens, cycle and pedestrian paths and so on.

Led system:

It is equipped with a state-of-the-art LED system consisting of high efficiency Osram LEDs with color temperatures of 3000/4000 ° K and varying capacities from 22 to 29W, a system of optics that make it customizable according to the needs of the designer and according to the type of installation.
